

DS-DBRT-STAND-120207

BARYTES STANDARD DRILLING GRADE

Properties of Drilling Grade

Oil Drilling Grade Barytes (Standard Grade)

PROPERTY	SPECIFICATION
Specific Gravity, g/cm ³	>4.2
Water soluble alkaline earth metals (eg Calcium)	250 ppm maximum
Mercury (Hg)	1 ppm maximum
Cadmium (Cd)	3 ppm maximum
Extractable Carbonates - wet measurement	3,000 mg/l maximum
Moisture	1% maximum

Product Description

Grey barytes with specific gravity >4.2 and low trace elements, particularly for Hg and Cd, to meet API specifications for Oil Drilling Grade

Product Form and Storage

Bulk - Lump size, 0 – 150 mm (95% minimum)

Big Bags, 200 mesh (barytes selected and milled in Zhanjiang Plant, China)
Store in a cool, dry area
